This home sets a standard for single storey living that clearly differentiates it from imitators. Byron's opulence is enhanced by a symmetrical approach to its many outstanding features. When entering the home, viewers are drawn to the large and imposing formal lounge room. From there they can journey to the home's many rooms, including the large master bedroom with ensuite and walk-through robe. Both the living area, lounge and master bedroom precincts ensure access and light are key features with their wide exits to the rear Pavilion.

A cluster of bedrooms toward the front of the home presume a locale in keeping with a design of this standard. With either conservative or contemporary facade options, Byron invites close inspection.
