sorrento

The inspirational Pivotal Properties range now extends to dual occupancy designs with the introduction of the Sorrento. Built to feature privacy and functionality, both three bedroom homes use their two storey layout to advantage.

Owner-occupiers will appreciate the unique ambience of each home. Investors on the other hand will notice the design has been crafted for a minimum of maintenance. Quality fittings and fixtures ensure years of trouble-free ownership while adding to the desirability of the property for discerning tenants.

Downstairs both sides of Sorrento are light-filled and fuss-free. Alfresco areas encourage entertaining at the extremities of the design. Upstairs each master bedroom has walk-through robe and ensuite.

Land developers have long appreciated the approach of Pivotal Properties to streetscaping their homes. Sorrento draws on this creativity to provide a brand new approach to twin living.
