## sunset

Sunset highlights the inspiration that Australian designers have drawn from the South East Queensland living experience. An open passage leads the occupants from bedroom to bedroom with a minimum of fuss, while keeping the sleeping and living areas at either extremity of the home. For the ultimate in functionality the home features an extra storey dedicated to a parent's retreat or home office area.

Sunset has been crafted to explore the potential of a sloping block without compromising on the desirability of the layout when coupled with a flat section. It boasts a streetscape that invites passersby to enjoy the form and function of a home as beautiful outside as it is internally.
